## FROM INSPIRATION TO INDUSTRY

“

**SkyNet** brings the future to the present with creative insight to our changing world and offering the cutting edge information and technical services.

”

**S**kyNet Satellite Communications foundations started over 150 years earlier with the Davis family company, Charles Davis, manufacturing carriage lanterns.

From these early signalling and communications devices who would have believed several generations on that we would be delivering communications.

SkyNet has embraced change and the evolution of global communications, now delivering solutions based on every continent across the world.

SkyNet is at the forefront of change and the cutting edge of evolution in communications and software design. Our world is about to explode with technology advancement and efficient information services.

As people, never before have we embraced the desire to be more informed and analyse what we are doing and how we

do it so that we can reduce clients service costs and provide significant benefit from innovative technology.

SkyNet brings the future to the present with creative insight to our changing world and offering the cutting edge information and technical services.

Communications beyond the horizon is just the first step in bringing everyone and everything closer together with intelligent solutions at the heart of every success.

Chief Executive Officer

# Reach Operational Excellence IN REAL TIME

## PRODUCTS AND SERVICES

Our product range includes global satellite communications, aircraft flight and data management, personal security, remote asset security and fleet management software.

- Find the best possible solution for your business.
- Ensure a smooth transition when integrating our services and technology into your operations environment.

### **SkyNet change the game with Predictive Capabilities**

Identify problems before they become a disruption. Anticipate opportunities. Keep your fleet operating as efficiently and cost-effectively as possible.

SkyNet puts real-time intelligence in your hands to optimize maintenance, logistics and overall operations.

## THE COMPANY

We offer flexible, customized solutions that meet your unique needs – along with a dedicated, network of technical resources to support your operations at the local level. After all, we've been delivering services expertise to our customers for more than 15 years.

SkyNet Satellite Communications is a highly reputable and forward thinking software engineering company that have pioneered flight tracking technology from a "dot on a map" to fully integrated communications systems.

At SkyNet Satellite Communications, we are always committed to your business. And that is a promise.

Our knowledge and understanding of satellite and GPS technology gives us the advantage in customising our software products to your own specific needs and requirements.

SkyNet provide a wide range  
of communication solutions

## WHY CHOOSE SKYNET

When operations go down suddenly due to unexpected issues, the impact to customers can be substantial. An unplanned repair is costly, but of greater importance is the lost revenue opportunity during periods of extended downtime, as in the following examples:

- Interrupted oil and gas output when well production is taken offline suddenly
- Airline schedule delays and cancellations for unexpected aircraft repair
- Customer and public perception issues from safety and personal productivity

By utilising SkyNet technologies you are taking action with predictive maintenance to avoid the effects of any unplanned downtime.

By using our sophisticated BGAN and satellite monitoring systems we help you capture a wealth of data from a broad spectrum of industrial equipment.

Our customers use our data for real productivity and profitability gains – from asset to operations optimisation.

## INDUSTRY EXAMPLE OIL AND GAS SECTOR

SkyNet can provide the oil and gas industry a complete package of solutions that give you data-driven insights on everything from your equipment to your operations, all to enable better decision making.

With energy demands rising and reserves of oil and gas becoming more challenging to access, the productivity revolution is of vital importance to the oil and gas sector.

### These innovations include :

- Increased profitability.
- Greater mineral and gas production from mining operations.
- Improved staff care through to personal safety and productivity gains that speed up delivery.

With companies able to provide their own decades of manufacturing expertise that can be integrated with our expanding software engineering and satellite capability, SkyNet is leading the data revolution so that its customers can operate both more effectively and efficiently in both remote and local environments.

## OUR CUSTOMERS

**Our customers expect a lot from us  
- and they should.**

At SkyNet, our success relies heavily on the success of our partners. Whether you're a government department providing public services, a global or regional airline, a resources company providing products and services in regions across the world, our focus is helping you grow your company through our innovative software.

SkyNet has a long track record of creating value for our customers by applying a breadth of expertise across a wide range of businesses around the globe.

We demonstrate this expertise and commitment through integrated software programs that help our customers. It is this approach that provides the foundation for our partnerships, helping us solve our customers toughest challenges together.

Having the right people  
makes all the difference
